# Welcome to the World of Tyco.

In a very real sense, the World of Tyco has taken us forty-nine years to create. And we're proud that it's been well worth the effort.

The pictures on these two pages tell their own story. A story of people who care. And a story of product value. That word may seem old fashioned today, but it's a word we started with, and we've never forgotten it.

These things have helped us to achieve leadership in a competitive industry. Today, Tyco is America's largest manufacturer of electric trains, and the only company that builds a full line of both HO scale racing cars and trains. In fact, we're the most experienced and the largest manufacturer of HO electrics in the nation.

And while we became a part of Consolidated Foods Corporation just five years ago, we feel very much at home with an organization whose motto is *Responsive to Consumer Needs*.

Because the word *responsive* describes the attitude of our people. The people who built the World of Tyco. The people who continue to make it run.

And being responsive assures other words. Like quality. And value. And these too are words that can only be brought to life by dedicated people.

So welcome to the World of Tyco.

It's a mighty big world now. But we take our work just as seriously as we did when John Tyler built our first product in a small garage in New Jersey forty-nine years ago.

### POWERTORQUE DRIVE

After four years of development, we've come up with a whole new way to go. Our new PowerTorque drive coupler unprecedented power and traction with the smoothest starts and stops ever. So it climbs easier, pulls more, keeps cars on the track better. And still it used 20% less current than conventional motors.

# Introducing the Layout Expander System.

For the first time, there is an easy way to enjoy the hobby of model railroading. A way that does not require special skills. With the Layout Expander System, you can build the exciting Railroad Empire that you see here, in just 4' x 8' of space. And you don't need to become an expert at anything. Most important, you can do it in easy stages.

Take a close look at this layout. Each component in it is individually available. The more you add, the more fun you have. And every component is performance matched to the layout.

With the complete Layout Expander System, you can operate up to four trains. You can control two trains at a time independently, and you can switch any of the four trains among any of the three mainline tracks.

You have remote control switching, blocking and uncoupling. You can unload freight—logs, ore, crates, pipe—by remote control. You can even unload a piggyback trailer from one train and load it onto another—all by remote control.

This Instruction Manual is what makes it all possible. It has 32 pages of step-by-step instructions with easy-to-follow diagrams and illustrations. You can obtain it at your Tyco dealer. Or send one dollar to Tyco Customer Service, Moorestown, New Jersey 08057.

The easiest way to start your Railroad Empire is with the Track Layout Expander (Stock #7901). Here in one package is everything you need to expand any circle of track to a 4' x 8' double oval track layout, wired for 2-train operation (one train at a time with a single power pack). The Instruction Manual is included. See Page 14 for contents.
